

WHO ARE YOU GOING TO CALL?

Dan Horkan - Owner - Pre-Cycled Commercial Printers, New York

"We already owned Spiel's Sterling Digibinder perfect binder for a year when we had seen their Coilmaster Junior prototype at the Chicago show. We were amazed by it's ease of use. It has no real set up.

It's price point was lower than all the other automated plastic coil binders and it had all the features we were looking for. Since we were impressed with their perfect binder, it was a no brainer. We ordered the machine based on the prototype we saw at the show. We are now coiling hundreds of books per hour."
