Pro Punch

Key Features:

The Sterling® Pro Punch is a compact punching system equipped with a quick-change 14" die for efficient die removal and replacement. A micro-adjustable paper stop provides precise sheet positioning and repeatable punching alignment. The motor is activated only during the punching cycle, reducing unnecessary run time. The machine also features a large-capacity waste drawer and a reversible motor function to assist with clearing jams. Custom dies are available for application-specific punching requirements.

*Standard dies for wire-o, coil, comb and 3 hole. Custom dies are available.

- Quick-change 14" die system
- Micro-adjustable paper stop
- Motor operates only during the punching cycle
- Compact footprint
- Large-capacity waste drawer
- Reversible motor for jam clearing
- Custom dies available for specialized punching applications
