

The PT33LSC is the world's first fully automated laminator that slits and cuts to finished size saving hours of trimming and cutting after the laminating process. Designed to meet the demands of the digital short run printer, the PT33LSC not only cuts to bleed but has pouch mode where you can choose your encapsulation size or perform true single sided laminating with the ability to easily control the curl with the anti-curl devise. Automatic setup, productive speeds and the efficient pile feeder makes for a "set it and forget it" laminating experience.

**SPECIFICATIONS**

<b>Min Sheet Size</b>	7" x 7"
<b>Max Sheet Size</b>	13" x 19.7"
<b>Paper Thickness</b>	100 – 350 GSM
<b>Lamination Thickness</b>	1.5, 3, 5 mil
<b>Laminating Modes</b>	Double sided, single sided with anti-curl device with no need for release film, adjustable encapsulation and trim to bleed
<b>Lamination Width</b>	4.4" - 12.9" *custom widths available
<b>Cutting Method</b>	2 automatic setup side slitters and 1 guillotine cutter assembly
<b>Feeding Method</b>	2" vacuum pile feeder
<b>Speed</b>	Variable speeds up to 10 feet per minute
<b>Power Requirements</b>	110-130V, 50/60Hz, 15A
