

**Revo Flex**  
with stand (included)

**Revo Flex**  
Four side trim function  
with or without margin.

**Revo Flex**  
Sheet Feed Skew  
Adjustment.

## Revo Flex

Join the revolution with the all new Revo Flex next generation fully automatic laminator. The Revo Flex 4 side trimming system allows for true flush cuts or encapsulating a sheet with lamination. The position of the cuts are fully adjustable to create perfect flush cuts or custom size encapsulation borders. No need for additional processing to trim all 4 sides of a sheet. Feeding, laminating, cutting and trimming are now fully automated with the press of the start button.

### Customer Benefits

- 4 side internal trimming system for flush cut
- or encapsulation
- New no waste run mode eliminates sheet trim
- Compact design with stand included
- Automatic paper feed, laminate and cutting in one process with one button push start
- Automatically stops when complete
- Adjustable speed for high quality results on various sheet weights and film thickness
- Process up to 420 sheets per hour
- Simple access from top for easy roll change
- Adjustable resist roller pressure to stop multi-sheet feeds over a range of paper stocks
- Feeder holds up to 200 sheets
- Easy to use touch panel for all adjustments

### Maximum

- film width  
**12.6"**
- sheet width  
**13"**
- max. mil  
thickness  
**1.5 - 5 mil**

### Output

- drive  
**110v**
- inches per minute  
**27.5 - 78**
